PROJECTS

WEATHER APP

HTML , CSS & JavaScript

- Developed a weather app website using HTML, CSS, and JavaScript, enabling users to access real-time weather information.
- Integrated features allowing users to search for a city or use their current location to retrieve weather conditions such as temperature, humidity, and wind speed.
- Designed and implemented the project to practice and demonstrate front-end web development skills.

TEMPERATURE CONVERSION PROGRAM

HTML , CSS & JavaScript

- Created a temperature conversion program website using HTML, CSS, and JavaScript to enhance front-end development skills.
- Enabled users to seamlessly convert temperatures between Celsius, Fahrenheit, and Kelvin by entering a value in any unit.
- Implemented automatic conversion functionality to display results for the other two units instantly.

AMAZON UI CLONE

HTML & CSS

- Designed and developed a basic weather app website using HTML and CSS to create a visually appealing and user-friendly interface.
- Focused on displaying weather information in an organized and accessible format.
- Built the project to practice and showcase front-end development skills, emphasizing proficiency in HTML and CSS.

SKILLS

- HTML 5
- CSS 3
- BootStrap CSS
- Tailwind CSS
- JavaScript
- Java
